Delhi NCR | Haryana | Uttarakhand | Punjab | Rajasthan | Uttar Pradesh | Himachal Pradesh | Jammu & Kashmir

Presenting

DUMBWAITERS

EASA Dumbwaiters

How about transporting piping hot food for the guests and raw materials to the kitchens between various floor levels with ease! resulting in saving of precious time and effort of the manpower in the hospitality industry. Transporting groceries without lifting a finger in a shopping unit, or even bringing down laundry or serving food on terrace gardens at home. Sounds amazing!

EASA brings state-of-the-art Dumbwaiters with features that fit modern needs such as space, temperature, and humidity control, across various industries. Making daily life easier- There is no better investment than a dumbwaiter!

EASA Dumbwaiters

Dumbwaiters are small service elevators utilised in Homes, Hotels, Hospitals, Banquet Halls, Libraries, Industrial Kitchens, Departmental Stores & Restaurants to carry food. Our range of elevators is specially designed to complement all types of modern, classic, retro, and contemporary-styled buildings.

Why install one?

MORE SPACE

Great space savers. On average, dumbwaiters utilize 50%-75% less floor space than elevators. They are designed to fit in any space.

DAY-TO-DAY EFFICIENCY

Quicker. Faster. Greater work efficiency—These are some of the value-added benefits one would get to see in the employees in the factories, units, or other industries.

INCREASED HOME VALUE

Besides adding that touch of sophistication and class, home dumbwaiters promote convenience, and safety, and increase the resale value of your home. Dumbwaiters offer a cost-friendly solution for homeowners.

SAFETY

The doors have electric interlocks to prevent cabin from moving while loading and unloading. The stainless body of the cabin makes it hygienic, and easy to clean.

CUSTOMISED DUMBWAITERS

At EASA, we believe in custom-designing every dumbwaiter. Because we do not believe in 'one size fits all.' We ensure that the elevator is designed and installed basis the requirement and size of the building. This allows the pricing to be flexible and tailor-made without compromising on quality.
